EPA DOCKET CENTER

To the EPA,

I am writing concerning my request for more time to sell my stock of wood and pellet stoves that are not 2020 complaint.

I'm not buying stoves to put in stock that don't meet 2020 complaint. It is making it very difficult to keep a good stock and showroom filled with stoves. I have been selling off what I can this year.

I will only buy stoves that are not complaint as they are order. Again making it very difficult to sell.

I have stoves on my shelf sometimes takes 4 years. I have several manufactures that I have to stock or I can't get them. My customers come in the store and have to have now. If they have to wait I loose the sale.

I would love to know soon if I could have a two year extension. It would help. I will need all that time to sell what I have and I could put a few more stoves on floor.
