Subject: Docket ID No. EPA-HQ-OAR-2018-0195

To whom it may concern:

I am a small manufacture of the Crown Royal Stove brand, which is a line of outdoor furnaces that heat homes and businesses, www.crownroyalstoves.com. Currently we have three models that meet or exceed the current regulations and are listed on the EPA website for hydronic heaters. Our small business employs around 40 people that currently work full time, year round.

We have worked extremely hard in our research and development since 2007 to get to this point, with absolutely no outside help. We are currently testing for the 2020 regulations, which take effect soon, but are having a hard time getting our products to pass in the timeline given. We have invested \$250,000+ of our own working capitol and are worried about the future of our company, if there is no relief given.

Please consider the small companies, and look at giving more time for us and others with smaller amounts of capital, to pass the test so we can continue the great tradition of heating with wood.
